PERFECT PROTECTION MEANS BEING EQUIPPED FOR ANY SITUATION.

Storopack is a specialist in protective packaging. Our promise is to provide “Perfect Protective Packaging” to optimally protect every product while in transit. We think holistically, advising our customers on how to make the packaging process more efficient and, if desired, integrating tailored solutions. Our comprehensive range covers all of the requirements associated with optimal product protection. With 2,300 employees at certified production facilities and locations in 18 countries, we maintain a decentralized structure and are always in direct vicinity to our customers.

OUR STRENGTHS – YOUR ADVANTAGE:

- ▶ OWNER-MANAGED FAMILY COMPANY
- ▶ LOCAL CONTACTS
- ▶ INTERNATIONAL FOCUS
- ▶ RELIABILITY
- ▶ SERVICE AND CUSTOMIZED ADVICE
- ▶ HIGH PRODUCT DIVERSITY
- ▶ CONTINUOUS IMPROVEMENT OF PACKAGING PROCESSES
- ▶ PROCESS OPTIMIZATION
- ▶ COMPLETE SOLUTIONS ALL FROM A SINGLE SOURCE
- ▶ TURN-KEY SOLUTIONS WITH AUTOMATION PROCESSES

COMFORT.PACK FOCUSES ON ERGONOMICS IN THE PACKAGING PROCESS.

Ergonomics at the workplace is important, because incorrect movements and unnecessary walking distances when packaging your products cost time and energy. And affect the health of employees in the long term. COMFORT.PACK from Storopack combines both: comfortable workflows and efficient processes. Unnecessary movements are avoided, as the packer always has all of the packaging materials conveniently within reach at an ergonomic height. The individually customised packing stations are ergonomically designed in line with the Storopack Working Comfort® principle and not only increase the productivity of your processes, but also the well-being of your employees. COMFORT.PACK stations prevent strain and thus increase satisfaction and motivation.

INDIVIDUAL CONSULTING

Our experts analyze your existing packaging processes and come up with the right solution, taking into account ergonomic aspects. The focus here is on the efficiency of the processes and the well-being of your employees in equal measure.

The modular concept of the packing stations makes your packaging processes fit for the future: Based on the modular principle, the packing stations can be expanded at any time. They can always be adapted and integrated to the individual needs of the packers and the requirements of your packaging process.

THE BENEFITS OF COMFORT.PACK

- ▶ PRODUCTIVE: FROM SHIPPING BOXES TO PROTECTIVE PACKAGING AND LABELING, COMFORT.PACK CAN COMBINE ALL PACKING FUNCTIONS, SAVING TIME AND WALKING DISTANCES
- ▶ USER-FRIENDLY: ERGONOMICALLY DESIGNED IN ACCORDANCE WITH THE Working Comfort® PRINCIPLE
- ▶ CUSTOMIZABLE: THANKS TO THE MODULAR PRINCIPLE, EACH COMFORT.PACK station IS ADAPTED TO THE CUSTOMER'S NEEDS; EACH SOLUTION IS DEVELOPED INDIVIDUALLY
- ▶ VARIABLE: COMPREHENSIVE SOLUTIONS FOR ALL OF STOROPACK'S PACKAGING MATERIALS: AIRplus®, PAPERplus®, PAPERbubble®, FOAMplus® AND Loose Fill
- ▶ ELEGANT: USE OF HIGH QUALITY AND VISUALLY APPEALING MATERIALS; POSSIBILITY TO CHOOSE CUSTOMIZED COLORS OR LOGO ENGRAVINGS

CONSULTING AND SERVICE

SERVICE MEANS
FOCUSING ON CUSTOMERS'
REQUIREMENTS.

GOOD CONSULTING MEANS
DEVELOPING TAILORED SOLUTIONS.

05 SERVICE

Our services are not limited to personal support from our specialists and on-site service. We permanently inform our customers about new technologies, materials and processes and advise them on the further development of existing packaging processes. Thanks to our large global service structure, Storopack is always at your side.

04 DELIVERY

Storopack's experts install the COMFORT.PACK station professionally and train the operators thoroughly. This ensures optimal use of the solution and the corresponding protective packaging.

03 PRODUCTION

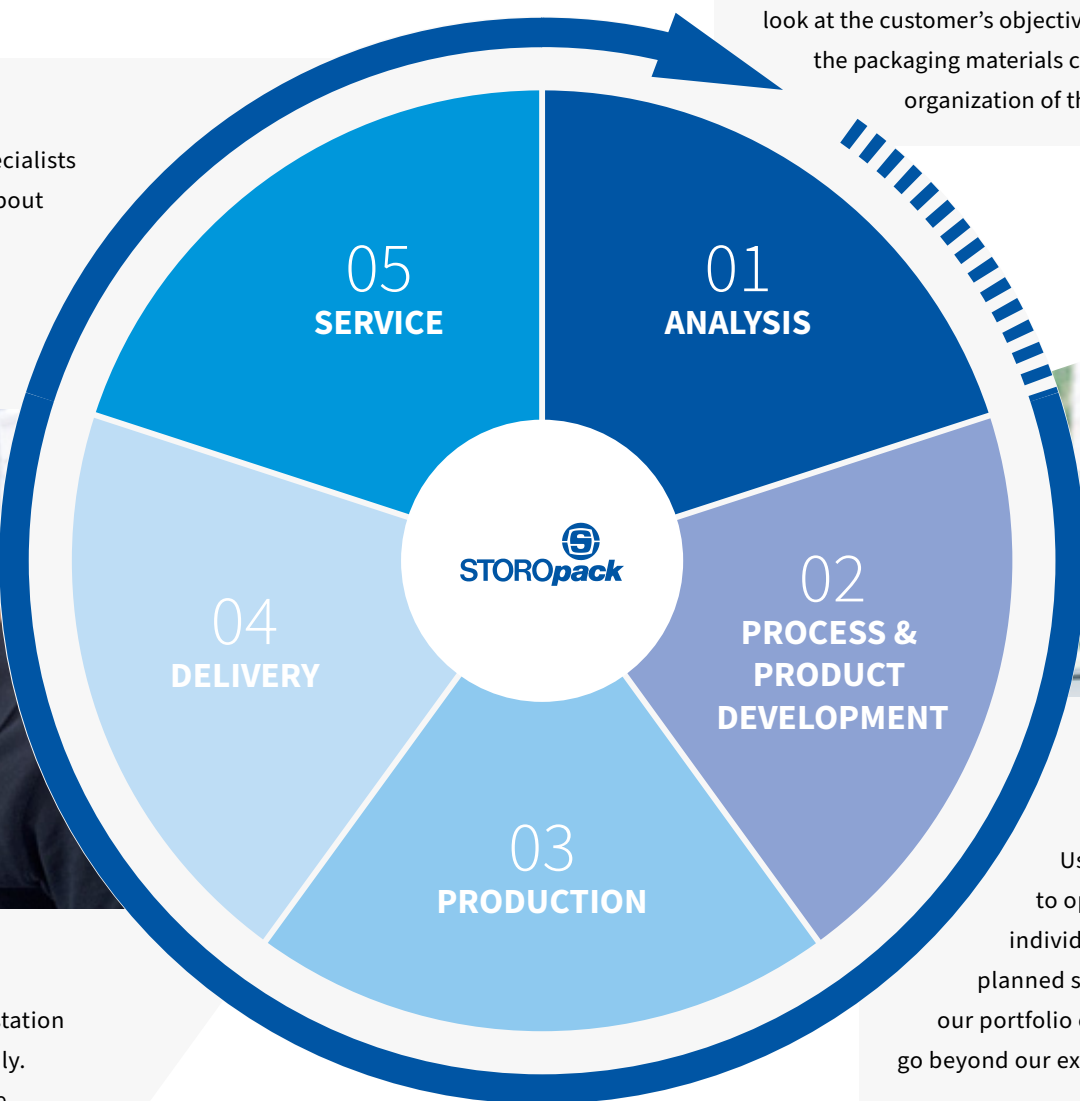

Under constantly monitored quality standards, we produce the developed COMFORT.PACK station in our Storopack Service Centers in Germany and the USA and in cooperation with our partners.

01 ANALYSIS

The analysis phase is integral to the success of this process. We take a close look at the customer's objectives as well as the products to be packaged, the packaging materials currently used, means of transport and the organization of the existing packaging process.

02 PROCESS AND
PRODUCT DEVELOPMENT

Using the findings of this analysis, concrete measures are planned to optimize the packaging process and the material. To illustrate the individual development, we create a detailed 3D visualization showing the planned solution. We use standard products from our portfolio or, if required, work with products that go beyond our existing product range.

COMFORT.PACK

VARIETY IS
OFFERING THE APPROPRIATE
SOLUTION FOR EACH
CHALLENGE.

COMFORT.PACK MEANS,
BEING MORE PRODUCTIVE WITH
ERGONOMIC PACKING STATIONS.

Ergonomic workstations and efficient processes - with COMFORT.PACK Storopack increases the productivity of the protective packaging process. Thanks to the modular design principle and an extensive selection of

accessories, our experts develop the right solution for every challenge. In addition, individual fabrications are possible for special customer-specific requirements.

PRODUCT PORTFOLIO

FLEXIBILITY IS WHEN THE EQUIPMENT IS CUSTOMIZABLE TO YOUR NEEDS.

Storopack has a wide selection of products to build the ideal COMFORT.PACK station for different needs. Our experts work closely with customers to develop the perfect solution. The products and solutions are tailored specifically to your requirements. We support you until you achieve the ideal results.

COMFORT.PACK TABLE

COMFORT.PACK Table
The COMFORT.PACK table convinces with a durable, moisture- and scratch-resistant chipboard according to EN 312. The HPL (High Pressure Laminate) coating on both sides according to DIN EN 438 makes the table particularly robust. The protection of the packer as well as the table edge is ensured by the blue ABS edging. Depending on customer requirements, this can also be designed with individual colors. The table thickness is 26.6 mm. Configuration as single or double packing station is possible. Optional manual or electric height adjustment. The maximum load capacity of the manually height-adjustable table is 600 kg.

STANDARD SIZES

Individual dimensions possible upon request.

- 2000 x 800 mm
- 2000 x 650 mm
- 1600 x 800 mm
- 1600 x 650 mm
- 1200 x 800 mm
- 1200 x 650 mm
- 700 x 800 mm
- 700 x 650 mm

HPL (High Pressure Laminate) coating

ABS-Edges

Manual or electric height-adjustment options (Shown: electric height adjustment)

EQUIPMENT TABLE TOP

SCALE CUTOUT
Cutout for scale; ideal for space-saving integration of a scale directly in the packing table.

BALL ROLLERS
Equipment of the table surface with ball rollers to support box movements (load capacity per roller 35 kg).

WATER ACTIVATED TAPE DISPENSER
Space-saving, recessed into the tabletop for greater ergonomics and efficiency. Shipping cartons can be quickly and easily fed over the dispenser for ergonomic sealing. Alternatively, the machine also produces adhesive tape strips in the desired length at the touch of a button.

- ▶ EFFICIENT: FAST CARTON CLOSURE WITH WATER-ACTIVATED TAPE
- ▶ ERGONOMIC: SHIPPING CARTONS DO NOT NEED TO BE LIFTED TO CLOSE THE BOTTOM FLAPS
- ▶ DURABLE: LONG OPERATING TIMES THANKS TO LARGER, INDUSTRIAL ADHESIVE TAPE ROLLS AND 3-LITRE WATER TANK
- ▶ SIMPLE: TOOL-FREE CLEANING
- ▶ FLEXIBLE: SUITABLE FOR ALL BOX SIZES
- ▶ SUSTAINABLE: WATER ACTIVATED TAPE CAN BE RECYCLED WITH THE CARTON

Seal cartons ergonomically:
The water activated tape dispenser is integrated into the surface of the packing table so that shipping cartons can be quickly and easily guided over the dispenser.

MAKE YOUR COMFORT.PACK TABLE A COMFORT.PACK STATION

RACK AND DRAWER SYSTEMS

RACK SYSTEM I
Sturdy rack with scratch-resistant melamine resin coating for storage of necessary work tools.

RACK SYSTEM II
Sturdy cardboard box rack with scratch-resistant melamine resin coating and dividers for storing shipping boxes. The dividers are individually adjustable.

RACK SYSTEM III
Sturdy rack with scratch-resistant melamine coating. Cable channel equipped with brushes, keeps the cables in place.

UNTERBENCH UNIT
Lockable underbench unit for storing shipping supplies for an organized appearance. Available with one or three drawers.

MOVABLE RACK SYSTEM
Optimal for storing large cardboard boxes close to the workplace. Rollers allow flexible positioning of the shelf. Individual dimensions possible.

EXTENSIONS

SIDE TABLE
Flexible extension for a packing station with HPL (High Pressure Laminate) coating on both sides. Can be planned next to or integrated into the packing table.

- ▶ WITHOUT ROLLERS
- ▶ WITH ROLLERS
- ▶ SURFACE WITH BALL ROLLERS

TRAPEZOIDAL TABLE WITH BALL ROLLERS
Ideal for the integration of a double packing station into a central conveyor system. The movement of the packed shipping boxes is optimally supported by the ball rollers.

ELECTRIC LIFTING TABLE
Great for ergonomic packing of large and heavy boxes. Space-saving integration into the COMFORT.PACK station and easy and stepless height adjustment via foot and hand switch. Optionally available with an integrated scale.

For ergonomic and organized work:
COMFORT.PACK, equipped with rack system,
silo and electric lifting table

FLEXIBILITY IS
WHEN THE PACKAGING ADAPTS TO THE
GOODS AND NOT THE OTHER WAY AROUND.

COMFORT.PACK and protective packaging material go hand in hand: whether it's loose fill, foam, air pillows, or paper cushioning. Storopack's AIRplus®, PAPERplus®, PAPERbubble®, FOAMplus®, or Loose Fill offer just the right solution.

DESIGNED BY STOROPACK

We provide you with our extensive selection of protective packaging and also our decades of experience. We offer detailed advice and work with you to develop an appropriate solution featuring products from our large range.

SUSTAINABLE AND RESOURCE-SAVING

When it comes to choosing protective packaging, the benefits and functions of our products play a crucial role. That's because whenever a product is damaged in transit, resources are consumed unnecessarily due to new production and additional transport, thus harming the environment.

Additionally sustainable raw materials are a great way to protect the environment and natural resources. Our product portfolio therefore already includes many products that are made using recycled or renewable raw materials.

 **More about Flexible Protective Packaging from Storopack:**
www.storopack.com/products/flexible-protective-packaging

**INTEGRATION OF PROTECTIVE PACKAGING
AT THE COMFORT.PACK station**

SILO
Stable, durable solution for stocking paper or air cushions for fast and ergonomic removal. This ensures automatic production and continuous availability of packaging pads. The protective packaging system can be lowered to the individual working height for convenient paper or air cushion roll change thanks to a lift system. Different silo sizes and configurations for multiple packers are available depending on requirements. Our experts will provide detailed advice upon request.

Can be used to integrate the following products:

- ▶ PAPERplus® Papillon
- ▶ PAPERplus® Track
- ▶ AIRplus® Mini

SWIVEL ARM
Flexible, space-saving swivel arm for ergonomic removal of paper pads.

Can be used to integrate the following products:

- ▶ PAPERplus® Papillon
- ▶ PAPERplus® Track
- ▶ PAPERbubble®

UNDERTABLE PULL-OUT
For space-saving storage of packing material and machine under the table. The paper pads are dispensed through an opening in the tabletop. A convenient paper change is made possible by the pull-out function.

Can be used to integrate the following products:

- ▶ PAPERplus® Track

UNDERBENCH UNWINDING UNIT
For space-saving storage of packing material under the table. The cutting unit on the table enables ergonomic cutting.

Suitable for:

- ▶ PE FOAM FOIL
- ▶ PACKING PAPER
- ▶ CONVENTIONAL BUBBLE WRAP

OFFICE ACCESSORIES

FOLDING ARM MONITOR
Continuously adjustable support arm for a monitor up to 15 kg. Individually rotatable and tiltable.

ADAPTER KEYBOARD
Support arm for keyboard and mouse with connector for attachment to monitor folding arm.

FOLDING ARM KEYBOARD
Continuously adjustable support arm for keyboard and mouse for individual adjustment. Rotates, swivels and tilts for the optimal working position.

UNDERBENCH KEYBOARD DRAWER
Continuously adjustable pull-out for keyboard for installation under the table top. Optionally with or without mouse tray.

COMPUTER HOLDER
Computer holder for devices up to 230 mm wide to be installed on the table.

THIN CLIENT HOLDER
Computer mount for thin client devices of 35 - 53 mm width for mounting between support element and monitor. Can also be installed on the table.

PRINTER PULL-OUT FOR A4 PRINTER
Ideal for integrating a printer for printing shipping documents directly at the packing station.

PRINTER PULL-OUT FOR LABEL PRINTER
Optimal for printing shipping labels directly at the packing station.

POWER STRIP
Available in different country versions.

EQUIPMENT HOLDER
For convenient storage of handheld scanners or tape dispensers.

Perfectly equipped:
COMFORT.PACK with PC and keyboard

LIGHTING

LED WORKSPACE LIGHTING
Lighting for installation under a shelving system or above the packing station.
Our experts will advise you on the optimal illumination of the workstation.

SCALES

SCALE
Can be placed on the tabletop or recessed into the tabletop. An external display mounted at ergonomic height at the station allows ideal operation.
Dust and splash-proof according to IP65 standard; optionally with or without calibration.

ADDITIONAL ACCESSORIES

LABEL DISPENSER
Optimal for providing label rolls.

GRIDDED CUTTING MAT
Worktop protector with grid, available in green or gray in a wide range of dimensions. Reduces sliding movement on the table.

ERGONOMIC WORKING MAT
Accessories for the prevention of fatigue and appearances. Beveled edges reduce the risk of tripping.

PULLOUT FOR BINS
Waste disposal directly at the workplace thanks to garbage cans that can be pulled out from under the table. Available for one or two bins with different capacity.

CART FOR BINS
Customizable trolley for waste garbage cans, each with two swivel and brake casters.
Available with one, two or three plastic bins.

INDIVIDUAL IS WHEN THE CORPORATE DESIGN IS ALSO IMPLEMENTED AT THE PACKING STATION.

COMFORT.PACK is tailored to the customer's needs and developed individually. The design of the COMFORT.PACK station is as unique as its configuration. To ensure that the corporate design is also optimally implemented at the packing station, a large number of elements can be

equipped in desired colors or with freely selectable logos. Thanks to laser cutting, almost all shapes can be cut out precisely and cleanly. There are also virtually no limits in terms of color: even elements in different colors can be placed at a packing station.

Customer Case Studies

VELLY – PAPERplus® Chevron SEMI-AUTOMATIC AND ERGONOMIC

„We were very impressed by the overall concept and the fact that Storopack provides everything we need.“

ANTONIO CHIARELLO,
CEO VELLY

More than 350 hair salons are franchisees of the Velly company. These are supplied with hair care products from around 18 brands from the company's headquarters in southwest Germany. To ensure the shipping goods are perfectly protected and reach the partners on time, the packaging process needs to be seamless. Storopack has made the process even more efficient with the integration of four COMFORT.PACK stations, which has ultimately increased packaging performance by 65 percent, from 60 to 99 boxes per minute.

Storopack optimized the packaging process with a comprehensive concept that, as requested, accommodated the current location of the existing shelves. At four state-of-the-art packing stations, up to eight employees can pack the picked goods in boxes, block and brace them with PAPERplus® Chevron paper cushions, and secure the packages with water-activated tape. These are then automatically transported via powered conveyor belts. The system registers the shipping label with cameras, sorts the packages according to shipping company, and sends them on their way. A practical feature is that the height is measured in the final step, with larger boxes wrapped prior to discharge and smaller packages simply allowed to pass through.

▶ **Video:** www.storopack.com/velly

The company Esterline Connection Technologies – SOURIAU – SUNBANK in France designs, manufactures and markets interconnection solutions for severe environments. With an integrated distribution line consisting of four height-adjustable COMFORT.PACK stations and a strapping machine a maximum of 700 packages a day are shipped. The packaging material – AIRplus® Void air pillows – is stored in a central COMFORT.PROTECT silo that makes it easily accessible for all packers.
